2 lb. cans .....	1 oz. bottle .....	.36	.24

### SPERGON

The new outstanding seed treatment by dusting for the prevention of seed born diseases and fungi causing low germination of seed. It is non-poisonous and does not harm the seed under any conditions of soil, moisture or temperature, according to results to date. It can be used for all kinds of seed. You will be pleased and surprised with the results.

Package Size	Dealer	Suggested Prices to Consumers
1 Oz. Envelope	\$3.60 per box of 24	\$ .25 Each
5 Oz. Container	\$7.20 per carton of 12	\$1.00 Each

**DEAR CUSTOMER:**

For the past three years both your organization and ours has been under-manned and we could sell practically any type merchandise we had on hand without putting forth any effort. This picture is changing very rapidly and we again will have to put forth more effort, pushing side-lines that will fit into our particular business.

At this time we would like to call your attention to the insecticide line and other lines which we handle that will be of interest to our seed dealer customers.

**BLACK LEAF "40":** The supply of Black Leaf "40" is very limited and all distributors of this item are still on an allocation basis with the manufacturers. We have available only 5 oz. bottles, 1 oz. bottles, but hope to be able to offer you a complete line of Black Leaf "40" within the near future.

**SPERGON:** Spergon has been used profitably in Texas for the past two years and is now considered an outstanding seed treatment. We have stocks available in San Antonio and branch offices on all sizes listed on our price list and can make shipment from these points. If you have a particular problem pertaining to seed treatment, we would appreciate hearing from you and we will supply information regarding this problem.

**CROTOX:** This seed treatment is used to prevent ants from destroying seed corn while it is in the ground, also to prevent crows from pulling up the corn after it comes up. We carry stocks at our different branches of Crottox.

**CALCIUM ARSENATE:** Due to labor trouble in the Arsenic mines, the manufacturers advise that the supply will be limited this year. Calcium is used principally in dusting cotton for boll weevil and leaf worm, but is used to a certain extent in the vegetable growing areas. We have some Calcium on hand and would appreciate very much hearing from you if you are interested in purchasing in car lots and we will then make every effort possible to locate and quote you on this quantity.

**DDT DUST:** We have stocks available, at our different branches, of DDT and will try to maintain these stocks throughout the growing season. DDT and Sulphur will be used extensively to control insects on cotton. Supplies are limited and possibly will not be enough to go around. Place your order now so that you will have adequate supplies for your customers. DDT has been proven to be a most satisfactory dust to control a great number of insects. If you have a particular problem and desire additional information on this dust, please let us hear from you.

**LEGUME-AID:** Legume-Aid inoculant has been sold extensively and has proved to be a most satisfactory Nitragin inoculant. Now that we are approaching planting season of legumes, we welcome the opportunity of booking you with your requirements early in order that we may place your order with the manufacturer, so that he will be in a position to deliver you fresh stocks. Shipments in 100 lbs. or more will be made from the factory and smaller quantities direct from our branch offices.

Looking forward to hearing further from you, we are

Yours very truly,

*Associated Seeds, Inc*
